

DDL ACTUATOR DC DRIVERS

Actuator driver with main transformer 230 or 110 VAC and dc rectifier with current limit suitable for simple drive of actuator 12 or 24 volt at maximum current 6 or 3 amp. The driver has integral relays for switching the output voltage polarity. There is also a 9 volt battery emergency lowering function built in.

DDL - MODEL NO. DESIGNATIONS

Example: DDL-110-12

DDL - ADDITIONAL DATA

- 230 / 110 VAC input voltage
- 12 / 24 VDC output voltage
- Duty cycle 10%
- Current limit 6 or 3 A
- Integral relay for polarity switch
- Integral 9 volt battery lowering function
